

PSG ELECTROSPINNING MACHINE

SALIENT FEATURES

PSG Electrospinning machine is ideally suitable for industries and educational institutions. Nanofibers' diameter and other physical properties can be modified by adjusting the process parameters such as solution concentration, voltage, flow rate and the distance between needle and collector. Thus, this machine would help the researchers and students to learn the nanofiber processing techniques in detail. Customized set up can also be supplied.

*Suitable for the
Production of variety
of Nanofibers*

A versatile and cost effective machine to design and produce nanofibers with ease
